

TRT Software Update Release Notes

- Age Verification- Customers must scan a valid State issued Identification card before redeeming a ticket
- The age verification is currently defaulted on; however, this feature can be disabled. You may disable the age verification only if the establishment does not allow minors at anytime
- The Kiosk ID must now start with a lower-case k followed by an exclamation point and then the kiosk id number (example: k!)
- The audit tickets, now account for the bills in the reject bin
- There are now two audit tickets instead of one
- Audit ticket change; Counts before is now renamed to Bills remaining. Counts after is now renamed to current bill count
- The scanner must be reconfigured to accept the identification card, scan the follow barcodes in the order of, enter setup, disable code 128, exit setup:

0006010
