Disabling WiFi on Linksys Router

- 1. Connect computer ethernet cable to any numbered port on router
- 2. Disconnect any internet cable
- 3. Open web browser. In URL bar type 192.168.0.1 and press enter
 - a. If you get a "No internet connection" window, just wait this will change when the router fully boots.
- 4. Login page will appear. Username and password are both admin
- 5. Close popup window
- 6. Click on Wireless tab
- 7. Set configuration to Manual
- 8. Set Network Mode drop-down to Disabled
- 9. Click Save Settings and exit browser

Please note: If you are using a different router, you must use the owner's manual for that router to disable the WiFi.
